

# March 2022 Webpage Scavenger Questions

Randy Oliver Website

## Scientific Beekeeping, First Year Beekeeping

1. What is his number one feedback from first-year beekeepers?
2. List one beginner book he recommends
3. What kind of smoker does he prefer?
4. Does the shaking of bees from frames elicit defensive behavior?
5. What is the last bullet point item in his recipe for healthy hives?
6. How quickly can a nuc starve if it doesn't get fed?
7. What month has the highest pollen availability in his location and what plant is blooming?
8. What is the first thing to be concerned about in January, and the last thing to be concerned about in December?
9. What interface should you look for to tell the health of a hive?
10. Give two signs that you have a failing queen.
11. What are Randy's thoughts on treatment-free beekeeping?
12. For a split, when do you treat with Oxalic acid? (each half has a different answer)

People that answer all questions correctly will get two free raffle tickets
